Introductory Remarks

This example presentation aims to demonstrate basic functions in the \LaTeX -Beamer-Class. For everything else you might want to check ...

- \LaTeX -Reader Freitag & Machicao y Priemer (2019)
- \LaTeX -Workshop for Linguists Machicao y Priemer (2020)
- The Beamer Class User Guide Tantau et al. (2024)
 - and the Beamer Class Cheat Sheet Masson (2020)

Introductory Remarks

Further information for these files:

- Compile the file `MyP-slides-master.tex` with `PDF \LaTeX` and `Bib \TeX` .
- The content of these slides is in `text-slides.tex`.
- Extra files needed are stored in the folder `texfiles`.
- The “style” file for these slides is defined in `texfiles/tex-styleHU/huberlin.sty`.
- The packages are loaded in `texfiles/localpackages.tex`
- Customised commands are defined in `texfiles/localcommands.tex`
- The `Bib \TeX` file is `texfiles/localbibliography.bib`.
- The style files for the bibliography are `texfiles/unified.bst` (for English) and `texfiles/deChicagoMyP.bst` (for German).
- `localpackages.tex` and `localcommands.tex` are loaded in the “master” file `MyP-slides-master.tex` via the command `\input{name-of-file}`

③ Useful Presentation Elements

Introduction

- A presentation serves as visual support for your talk, hence, information and elements should be used sparsely to not distract the audience from what you have to say.
- In this (very short) example presentation some of the most useful elements will be demonstrated.
